

# CORNISH (SILVER GREY) HORTICULTURAL GRIT 2-5MM

**BURY HILL**  
LANDSCAPE SUPPLIES

Our Cornish Silver Grey Horticultural Grit 2-5mm is produced from 100% Cornish granite chippings and is a gardening essential for improving the structure and drainage in soils. With a neutral pH, our Cornish Horticultural Grit is ideal for dressing pots, troughs and rockeries and can be blended with soil or compost to make a great potting medium for growing Cacti, Succulents, Alpines and Rock Plants in addition to use with seedlings and cuttings.

Cornish Horticultural Grit is a bi-product of the Cornish china clay industry and will assist in breaking down heavy soils whilst at the same time increasing aeration and aiding water retention thereby greatly assisting strong and healthy root and plant growth.

## PRODUCT BENEFITS
