

2-4MM LECA®

(LIGHTWEIGHT EXPANDED CLAY AGGREGATE)

BURY HILL
LANDSCAPE SUPPLIES

Leca® is a highly durable lightweight aggregate, which is produced in the form of a round shaped hollow clay pellet with a ceramic resistant exterior skin and a porous, lightweight, interior nucleus. Simply put, Leca® is a super lightweight, inert and non-combustible aggregate.

PRODUCT BENEFITS

- Genuine 2-4mm Leca®
- Creating Lightweight Green Roof Soils & Substrates
- Lightweight Drainage Aggregate for Pots Planters & Containers
- Low Density, High Strength, Anti-Compaction Backfill
- Good Drainage & Aeration Properties
- Insulation Properties, Frost Resistant
- A1 Fire Rated (non-combustible)
- Reducing Point Loadings

Bury Hill only stock genuine Leca® which is supplied to us by Leca®UK
